

Break the Cycle!

Hospital → Rehab → Home... to Hospital Again

Let's change the story... Too many patients are caught in the revolving door of hospitalizations. Discharge, recover, relapse, repeat. But it doesn't have to be this way.

Home Care is the Missing Link in Preventing Readmissions!

Home care professionals are uniquely positioned to provide the **ongoing support** patients need **after discharge** – right in the comfort of their own homes.

Home care helps keep patients out of the hospital with...

- ✓ **Monitoring & Early Intervention**
Caregivers spot red flags before they become emergencies.
- ✓ **Medication Reminders**
Support with complex medication regimens reduces avoidable complications.
- ✓ **Daily Living Assistance**
Help with meals, mobility, and hygiene prevents setbacks and promotes recovery.
- ✓ **Reduced Social Isolation**
Regular check-ins boost mental health, a key factor in overall wellbeing.
- ✓ **Care Coordination**
We collaborate with healthcare teams to ensure continuity and compliance.

REPORT CARD	
Lower readmission rates	✓
Higher patient satisfaction	✓
Better outcomes & cost savings for the entire healthcare system	✓

We're Your Trusted Home Care Partner.

Together, we can reduce readmissions & give patients the best chance at lasting recovery.
