

PUBLIC SAFETY BULLETIN

Senior Home Security: Reducing the Risk of Intruders

The Federal Bureau of Investigation Elder Fraud Reports suggest that seniors lose billions annually to fraud. Fraud thrives in isolation, and many scams begin at the front door.

SPRING INCREASES THE RISK DUE TO...

- Fake contractors
- Utility impersonators
- Yard service scams
- “We were working next door...” tactics

HOME CARE MAKES THE DIFFERENCE

Caregivers provide...

- Supervised contractor visits
- Mail/package monitoring
- Scam detection
- Daily safety awareness
- Consistent presence (deterrence factor)

A visible caregiver presence significantly reduces vulnerability.

THE 7-POINT SENIOR SAFETY CHECK

1. Install motion-sensor lighting.
2. Reinforce door strike plates.
3. Use video doorbells when possible.
4. Lock windows even during ventilation.
5. Never open doors without verification.
6. Create a “no-cash-at-door” policy.
7. Establish a “call-first” family protocol.

Safety is more than grab bars. It's protection.
